Enercare Smarter Home® Essentials Package

PERFORMANCE MONITORING

Using the data that comes through your Enercare Smarter Home® Hub, the HVAC Performance Monitoring System will look at both short and long-term patterns in your HVAC equipment and interpret the information, alerting you if there is an issue.

ENERCARE SMARTER HOME® HUB (x1)

The Enercare Smarter Home® Hub is what collects and analyzes the data from all your home devices, making sense of the information and then sending it out to your mobile app so you can control all of your Enercare Smarter Home products.

THERMOSTAT (x1)

In addition to the easy-to-set thermostat in your home, you can also set your home's temperature remotely on your desktop or within the mobile app.

WATER LEAK SENSOR (x1)

Leak sensors can be placed under a sink, near your water heater and around the dishwasher or washing machine, to alert you on your app if there's a leak in the area.

SMART VIDEO DOORBELL

See who's on your doorstep as soon as they ring the bell, right on your mobile phone.
