NOTES TO USERS

This map is for use in addressing the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, but it does indicate those areas that are most at risk. The **community map repository** should be consulted for specific information on additional flood risk areas.

To obtain more detailed information on areas at **high flood potential**, the following information has been determined. Users are encouraged to consult the Flood Profiling, Floods, Cycles, Lengths, and Detention Flood Hazard Data, and/or Summary of Detention Elevations tables contained within the Flood Profiling and Floods, Cycles, Lengths, and Detention Flood Hazard Data, which are shown on the FISRS represent sublethal water elevations. These DFPEs are intended for flood planning, setting priorities, and determining the need for flood protection. The DFPEs are not intended for use in determining the need for flood protection, but they are intended for use in determining the need for flood protection. The DFPEs are not intended for use in determining the need for flood protection, but they are intended for use in determining the need for flood protection.

[illegible]

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FISRI for this jurisdiction. The floodplains and floodways that have been transferred from the previous FISRI map have been adjusted to reflect these new stream channel configurations. The **stream channel** and **tributary data** values in the FISRI and the **Stream Inventory Study Report** (which contains authoritative hydrologic data) can be refined to show channel distances far off from what is shown on the map.

Please refer to the separately printed **Map Index** for an overview map of the country showing the layout of map pages, community map-repository addresses, and a listing of Communities subject to flooding. The **Map Index** also provides the map page for each community as well as a listing of the communities within each community as located.

If you have questions about this report, or questions concerning the National Flood Insurance Program in general, please call 1 - 877 - FEMA MAP (1-877-323-6242) or visit the FEMA website at www.fema.gov.

An accompanying FISRI Issuance report, Letter of Map Revision (LOMR) or Letter of Map Amendment (LOMA) Issuance portions of this report, and Digital versions of this FISRI may be viewed at www.fema.gov.
