Radon Test Report #20071706

To wasselljsn@comcast.net

To view your full report, click [here](#).

This radon test was provided to you by CONNECTICUT DEPT OF PUBLIC HEALTH / 860-509-8140.

Your radon result is here!

| | |
|----------|----------------------|
| Kit # | 20071706 |
| | Analyzed on 01/21/22 |
| Test | Activated Charcoal |
| Started | 01/10/22 at 7:00 pm |
| Ended | 01/15/22 at 11:00 am |
| Location | Basement |
| Type | FIRST |

1.5

pCi/L ± 0.4

Closed house conditions maintained during test.

What does my result mean?

The U.S. EPA recommended action level for indoor radon is 4.0 pCi/L. The EPA indicates that there is little short-term risk with test results in this range (0.0 to 1.9).

However, radon often changes due to seasonal weather patterns, so you may want to test again in another season or after structural changes as conditions may change over time. EPA recommends testing every 2 years. Future test kits can be purchased directly at radon.com.

LONG TERM RADON TEST KITS

The EPA suggests re-testing for radon every 2 years.
